

# 2022 DISASTER PREPAREDNESS IN QUEENSLAND

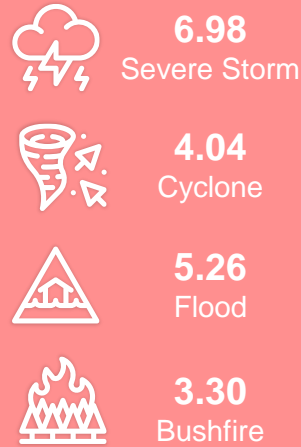

**Get Ready Queensland undertook state-wide market research in 2022 to understand Queenslanders' attitudes about their disaster risk and steps they have taken to prepare.**

History shows us that disasters can happen anywhere in Queensland with little warning such as a sudden severe storm that destroys homes, a drought breaking flood or a bushfire.

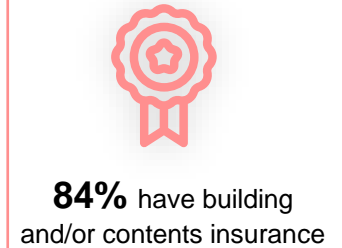

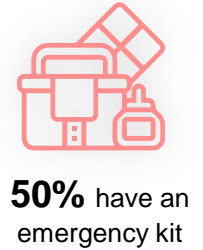

In the past decade, Queensland has been impacted by 97 significant natural disaster events and \$20 billion has been placed for relief, recovery and reconstruction works.

## Queensland communities rank their disaster risks

Scale of 1 to 10 (0 is unlikely and 10 is extremely likely)

## DISASTER PREPAREDNESS BEHAVIOURS

## 3 STEPS TO GET READY

Go to [www.getready.qld.gov.au](http://www.getready.qld.gov.au) to make your emergency plan.

Having a plan means your household is ready for extreme weather, with important contacts and household information that is right for you, your family, your pets and your property.

Understand your risk

Prepare a household emergency plan

Pack an emergency kit
